Volume contents

HYDROBIOLOGIA
Volume 431, Part I, 15 July 2000

Special Issue
Sediment–Water Interaction 10

Sub-Editor
H.L. Golterman

Editorial 1

The effects of *in situ* drying on sediment–phosphate interactions in sediments from an old wetland
D.S. Baldwin, A.M. Mitchell, G.N. Rees 3–12

The effect of organic matter on sedimentary phosphorus release in an Australian reservoir
C.J. Watts 13–25

Seasonal phosphorus release from exposed, re-inundated littoral sediments of two Australian reservoirs
C.J. Watts 27–39

Seasonal changes in sediment phosphorus forms in relation to sedimentation and benthic bacterial biomass in Lake Erken
W. Goedkoop, K. Pettersson 41–50

Sequential extractions of inorganic and org-Phosphate from fish pond sediments (Deroua station, Beni Mellal, Morocco) by different fractionation methods
J. Kassila, M. Hasnaoui, A. Yahyaoui 51–58

Physical and chemical characteristics of the sediment in the estuarine region of Cananéia (SP), Brazil
A. Jorcin 59–67

Effects of insecticide applications on macroinvertebrate density and biomass in rice-fields in the Rhône-delta, France
F. Suhling, S. Befeld, M. Häusler, K. Katzur, S. Lepkojus, F. Mesléard 69–79

Nutrient and faecal contamination and retention in wetland enclosures (gei wais) in the Mai Po Marshes, Hong Kong
S.S.S. Lau, L.M. Chu 81–92

Denitrification and a numerical modelling approach for shallow waters
H.L. Golterman 93–104

Volume 431, Part II, 25 July 2000

Opinion

Urban impacts on the ecology of receiving waters: a framework for assessment, conservation and restoration
C.J. Walsh 107–114

Phytoplankton composition, dominance and abundance as indicators of environmental compartmentalization in Jurumirim Reservoir (Paranapanema River), São Paulo, Brazil
M.G. Nogueira 115–128

The use of size-normalised procedures in the analysis of organic contaminants in estuarine sediments
G.F. Birch, S.E. Taylor 129–133

A function of cyanobacterial mats in phosphorus-limited tropical wetlands
E. Rejmánková, J. Komárková 135–153

Gut content analysis of *Gammarus lacustris* from a Siberian lake using biochemical and biophysical methods
M.I. Gladyshev, A.Y. Emelianova, G.S. Kalachova, T.A. Zotina, N.A. Gaevsky, M.D. Zhilenkov 155–163

Short-term influence of recolonisation by the polycheate worm *Nereis succinea* on oxygen and nitrogen fluxes and denitrification: a microcosm simulation
M. Bartoli, D. Nizzoli, D.T. Welsh, P. Viaroli 165–174

Can zebra mussels change stratification patterns in a small reservoir?
N. Yu, D.A. Culver 175–184

Genetic diversity in populations of a freshwater ciliate
J. Kusch, H. Welter, M. Stremmel, H.J. Schmidt 185–192

Eutrophication and recovery in the High Arctic: Meretta Lake (Cornwallis Island, Nunavut, Canada) revisited
M.S.V. Douglas, J.P. Smol 193–204

The freeliving nematode genus *Parodontophora* Timm 1963 (Nematoda: Axonolaimidae) is not exclusively marine: *Parodontophora limnophila* sp. nov. from freshwater in China
J. Wu, P.J. Somerfield, M.C. Austen, Y. Liang 205–210

Zooplankton community composition of lakes in the Yukon and Northwest Territories (Canada): relationship to physical and chemical limnology
K.M. Swadling, R. Pienitz, T. Nogrady 211–224

Research note

Tracing mangrove carbon in suspended matter and aquatic fauna of the Gautami–Godavari Delta, Bay of Bengal (India)
F. Dehairs, R.G. Rao, P. Chandra Mohan, A.V. Raman, S. Marguillier, L. Hellings 225–241

Author index 243
